**PIIPPO BALER TWINES**

MADE IN FINLAND

## PIIPPO BALER TWINES INCLUDE VALUABLE BENEFITS

**More meters per kilogram, per package and per pallet!** Thanks to Piippo's unique Firm Film Technology, one pallet of Piippo baler twine will carry up to 25 km more twine than a pallet filled with competitor's corresponding twine. By using Piippo twine, you will gain more meters and less weight on each pallet and save as much as 400 euros.

**Actual meters guaranteed – beware of what you buy!** Thanks to our accurate production standards, the baler twines run as much as the twine type indicates. The twine 130 runs 130 m/kg, and the twine 110 runs 100 m/kg. By choosing Piippo twine, you can get 20% more twine compared to the twines of other producers.

**Up to 30% higher breaking strength of all twine types!** The bales stay in good shape during storage and even withstand rough handling. Transport costs can be minimized, because the bales do not swell during storage time.

**Savings in spare part costs!** The softest twine on the market runs smoothly in the baler and prolongs the lifetime of knotters and other expensive metal parts of the baling machine.

**Greener world.** Sustainability in Piippo's operations is achieved by efficient use of exhaustible natural resources. As a result of this, our clients will benefit from higher knot strengths, cheaper prices per meter and less waste. One kilogram of Piippo twine gives longer and stronger meters.

Optimize big square baling by using a baler twine that matches your baler and your baling conditions. Big Square 130 is Piippo's best-selling twine and has the lowest meter price. This twine works in most balers and conditions. For the new HD balers and especially for straw, we recommend the Extreme 115 and Extreme Super 110. According to our tests, the strongest twine on the market is the Cropmaster 100. It is suitable for extreme conditions and super-dense balers – when nothing else is enough.

### PIIPPO® BIG SQUARE BALER TWINES

	Actual running meters	Package size kg	Running meters/package	Pallet size
Cropmaster	100 m/kg	21	2100	1008 kg
Extreme Super	110 m/kg	21	2310	1008 kg
Extreme	115 m/kg	18	2070	1008 kg
Magnum	122 m/kg	18	2196	1008 kg
Big Square	130 m/kg	18	2340	1008 kg

Piippo Traditional small square baler twine has been a classic since 1972. This twine is also perfectly reliable and offers up to 30% more meters than other types of twine on the market.

### PIIPPO® CONVENTIONAL BALER TWINES

	Actual running meters	Package size kg	Running meters/package	Pallet size
Hay	300 m/kg	10	3000	800 kg
Traditional	400 m/kg	10	4000	800 kg

Piippo round baler twines offer tight tolerances and stick extremely well to the bale. By using Long Champ you can save more money than ever in baling.

### PIIPPO® ROUND BALER TWINES

	Actual running meters	Package size kg	Running meters/package	Pallet size
Round Bale	600 m/kg	10	6000	800 kg
Triathlon	700 m/kg	10	7000	800 kg
Long Champ	850 m/kg	10	8500	800 kg

Piippo sisal baler twine is an ecological choice for round baling and high-density baling. It is made of agave fibers and is inelastic.

Sisal 200 m/kg	Package size 18 kg	Pallet size 1080 kg
